

We are pleased to be able to provide a full range of care for all our patients at this time. This includes not only emergency care, but also comprehensive treatment and preventative care, such as cleanings.

We ask that patients familiarize themselves with our protocols as we are strictly adhering to them. These can be found under the [COVID-19 link](#) on our website. Please respect that many of these protocols are set by our regulator, the Provincial Dental Board of Nova Scotia.

### ***What about vaccines?***

Because dentistry has been deemed an “essential” health care service, we will not ask about your vaccine status. However, regardless of vaccine status, we will expect that you adhere to our office protocols. These can be found at the link highlighted above.

***All members of the Wolfville Dentistry team are fully vaccinated.***

We thank all our patients for their continued vigilance, care, and understanding during this last year. Stay safe and keep kindness in your heart.
